

Upgrade Your Home with Triple-Pane Windows

A smarter choice for comfort, quiet, and long-term value

WHY CONSIDER TRIPLE-PANE WINDOWS?

When it's time to replace your windows, you have a choice that might span decades: standard double-pane or high-performance triple-pane. While both look similar, what's inside makes a big difference in how your home feels every day.

Triple-pane windows are designed to:

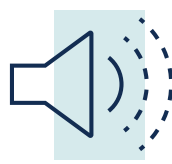

- Reduce energy waste by up to 40%
- Keep your home comfortable year-round
- Cut outside noise in half
- Increase your home's long-term value
- Helps your HVAC work more efficiently and last longer

WHAT YOU'LL NOTICE RIGHT AWAY

More Comfortable Rooms

No more cold spots in the winter or overheating near windows in the summer. Triple-pane windows help maintain even temperatures throughout your home.

A Quieter Home

Whether it's traffic, neighbors, or lawn equipment, triple-pane glass significantly reduces outside noise creating a calmer, more peaceful space indoors.

Lower Energy Bills

Almost always, windows are the least insulating part of a building's shell and most of the heat goes out where there's the least insulation. Upgrading helps your heating and cooling system work less, which can mean lower monthly costs.

A SMART INVESTMENT IN YOUR HOME

Triple-pane windows don't just improve how your home feels today, they also:

- Help protect against rising energy costs
- Improve resale appeal for future buyers
- Unlock and enhance other home upgrades (like heating and cooling improvements)

MAKING TRIPLE-PANE MORE AFFORDABLE

The Wise Window Hub leverages private-public partnerships to make sure contractors have access to as many high-performing options as possible. As a result, there are more options to choose from than ever before: the ENERGY STAR Product Finder shows over 900 product families with triple-pane options from over 80 manufacturers nationwide.

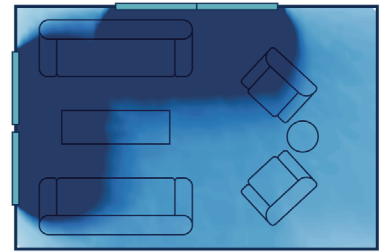

What to Look For

When it comes time to buy windows, lock in nearly twice the insulating power by selecting:

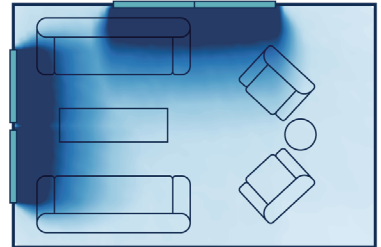

- ➔ **U-Factor of 0.22 or lower (often, these are in the ENERGY STAR northern prescriptive category)**

Triple-pane windows dramatically improve room comfort

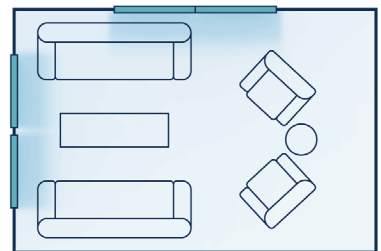

Single-Pane

Double-Pane

Triple-Pane

UTILITY REBATES

CenterPoint Energy, Minnesota Energy Resources, Minnesota Power, and Otter Tail Power all offer rebates for high-performance windows ranging from \$15-\$75 per window. To learn more about how to save money on your new windows, visit www.WiseWindowHub.org/utility-rebates or scan the QR code.

BOTTOM LINE

Triple-pane windows aren't just an upgrade, they're a smarter baseline for modern homes. You'll feel the difference in comfort, hear the difference in quiet, and see the difference over time in energy savings and home value.
